## **Take Care of Obamacare**

Dear Mr. President,

First of all, I would like to thank you for taking on the most demanding job in the World. I will never forget America's contribution in liberating Europe from tyranny during WWII.

I am so bold as to ask you to take a few moments of your precious time, to read a proposal of solutions, which would help the poor on the one hand and boost the economy on the other. A Nation is as prosperous as when most of its inhabitants are well-off and the poor represent only a tiny minority. Henry Ford followed this philosophy by paying his workers more than usual, knowing that only then can he sell his cars while thereby sustaining employment at the same time. With the years, our needs are changing. I see a flourishing economy in the sector of healthcare. Lifestyle and longevity will guarantee sought-after jobs in the near future. With "Obamacare", you have laid the foundation for this new economic era and I think that it is crucial to have this plan secured by a more humane strategy.

In the attached Position Paper you will find an outline of a subtle, yet liberal proposal.

I think that this paper, in your good hands, could be looked into by the appropriate agencies of the Democratic Party and might be a reservoir of impulses for ideas in your own future undertakings

Mr. President I would like to thank you for the attention you've given me and remain,

with best wishes for you and your family and for Bo and Sunny.

Respectfully yours

Meinrad Flüeler
